

New agreement affects recall process

A recently adopted labor agreement changes the way furloughed are recalled to active service. As part of the new agreement, TYE employees have the ability to self-recall if they can hold an assignment at another location. Additionally, the agreement allows senior employees to bypass recall if they are working another job.

The full text of the agreement can be viewed by visiting the Labor Relations page on the BNSF Employee Portal. Follow the link below for more information.
